Letter of Voluntary Consent for Inscription of Iranian Traditional Medicine on the Representative List of Intangible Cultural Heritage

To whom it may concern

I am a healer, and a member of a family that has been involved, generation after generation, in bringing comfort to people using the methodology of the Iranian Traditional Medicine. We have also succeeded in training a community of healers to promote health among people.

I was informed that the Iranian Traditional Medicine is being nominated for inscription on the List of Intangible Cultural Heritage. Expressing my, and my family’s, free, prior, and informed consent on the inscription of the Iranian Traditional Medicine, I would like to express a request on inscribing the mentioned traditional knowledge as a valuable heritage that continues to be transmitted from generation to generation.
